EXPERIENCE

Jun 2019 - Present
Full-stack Engineer – Codelink

➢ **PVH Global DAM** - I have been working as fullstack developer to translate PVH business idea into high quality code.

➢ **TimeTemp** handles the full process of managing management teams and temporary employees, with functionality for Recruiters, Managers and Employee - I handled part of back-end development in Ruby on Rails and the web front-end in ReactJS.

➢ **Codelink.io** is an internal team and project management system to manage all team members and their assigned projects - I worked as the sole developer to set up the platform and the SSO service.

Jan 2019 – Jun 2019
Full-stack Engineer – Bagang

➢ **Bagang** is a mobile app gives fast and easy personal loan. I worked as a full-stack developer of backend service, includes cloud microservices and internal web system to support operation team proceed user's application for loan.

Jun 2016 – Dec 2018
Print Solution Engineer – Laudert

➢ Created Print Media from a variety of Java enterprise databases and PIM systems with EJB applications that worked as publication servers with automation inDesign as frontend.

➢ Developed additional products to boost development: a Golang reverse proxy to debug/hijack Request and a framework to fix and enhance 3rd-party applications.

Nov 2012 – Jun 2016
Software Engineer – TMA

➢ **AMS 5520** - I was key developer of OSS Alarm Dispatcher application and developed automation driver and created the very first RESTful prototype of the project.

➢ **Text Integration** - worked as a team-lead to develop and test a web application called **TextIntegration** to integrate sending and receiving SMS promotions into CRM businesses.
