# AN DO

## JAVA DEVELOPER

**P** (+84)979-470-931   **E** ando.devel@gmail.com   **W** [andodevel.me](andodevel.me)   **G** [github.com/andodevel](github.com/andodevel)

## EXPERIENCE

### Jun 2019 - Present
### Full-stack Engineer – Codelink

➢ **PVH** working with a big brand in the fashion industry to implement DAM systems.

➢ **TimeTemp** handles the full process of managing management teams and temporary employees, with functionality for Recruiters, Managers and Employee - I handled part of back-end development in Ruby on Rails and the web front-end in ReactJS.

➢ **Codelink.io** is an internal team and project management system to manage all team members and their assigned projects - I worked as the sole developer to set up the platform and the SSO service.

### Jan 2019 – Jun 2019
### Full-stack Engineer – Bagang

➢ **Bagang** is a mobile app gives fast and easy personal loan. I worked as a full-stack developer of backend service, includes cloud microservices and internal web system to support operation team proceed user's application for loan.

### Jun 2016 – Dec 2018
### Print Solution Engineer – Laudert

➢ Created Print Media from a variety of Java enterprise databases and PIM systems with EJB-based publication server and automated Adobe inDesign frontend.

➢ Developed additional products to boost development: a Golang reverse proxy to debug/hijack request and a framework to fix and enhance 3rd-party applications.

### Nov 2012 – Jun 2016
### Software Engineer – TMA

➢ **Text Integration** - worked as a team-lead to develop and test a web application called **TextIntegration** to integrate sending and receiving SMS promotions into CRM businesses.

➢ **AMS 5520** - I was key developer of OSS Alarm Dispatcher application and developed automation driver and created the very first RESTful prototype of the project.
